

Pop-Up Egg Puppets!

YOU'LL NEED: CONSTRUCTION PAPER, SCISSORS, GLUE STICK, CRAYONS OR MARKERS, A POPSICLE STICK OR PLASTIC SPOON

1. CUT OUT YOUR SHAPES

- Fold a piece of paper in half. Draw an egg shape onto one side and cut it out- you should have 2 identical eggs!
- Stack them one top of each other, and cut a zig zag line about 1/3 of the way from the top to "hatch" your egg.
- Cut out your creature--it should be about half the size of the egg. Decorate however you like--what animals do you know that hatch from eggs? 🤔

2. BUILD YOUR EGG

- Tape your animal on the very end of a popsicle stick. If you don't have one, a plastic spoon works great!
- Give your critter an eggshell hat- put glue on the very bottom edge of one top piece, then stick your creature onto it. Then glue the other top piece on top.
- Add glue along the *bottom edge* of the eggshells in a U shape. Then, lay the stick on top so that the tops and bottoms line up along your zigzag.

3. FINISH

- Carefully glue the two eggshells together, making a popsicle stick sandwich! When you're done, you should have a complete egg shape.
- Move the stick up and down and watch your creature pop out! You can make a whole group of egg-cellent friends.
